

ADVANTAGES

- Wide clear area of binocular vision **in distance**
- Wide corridor provides a comfortable intermediate vision
- Low values of unwanted lateral cylinder
- Adjusted **near vision** for a clear view of the sports equipment (maps, compass, watch...)
- **Ergonomic position** of the head and body during sports activity
- **Swim effect minimized**
- High precision and personalization thanks to **Digital Ray-Path® technology**

TARGET

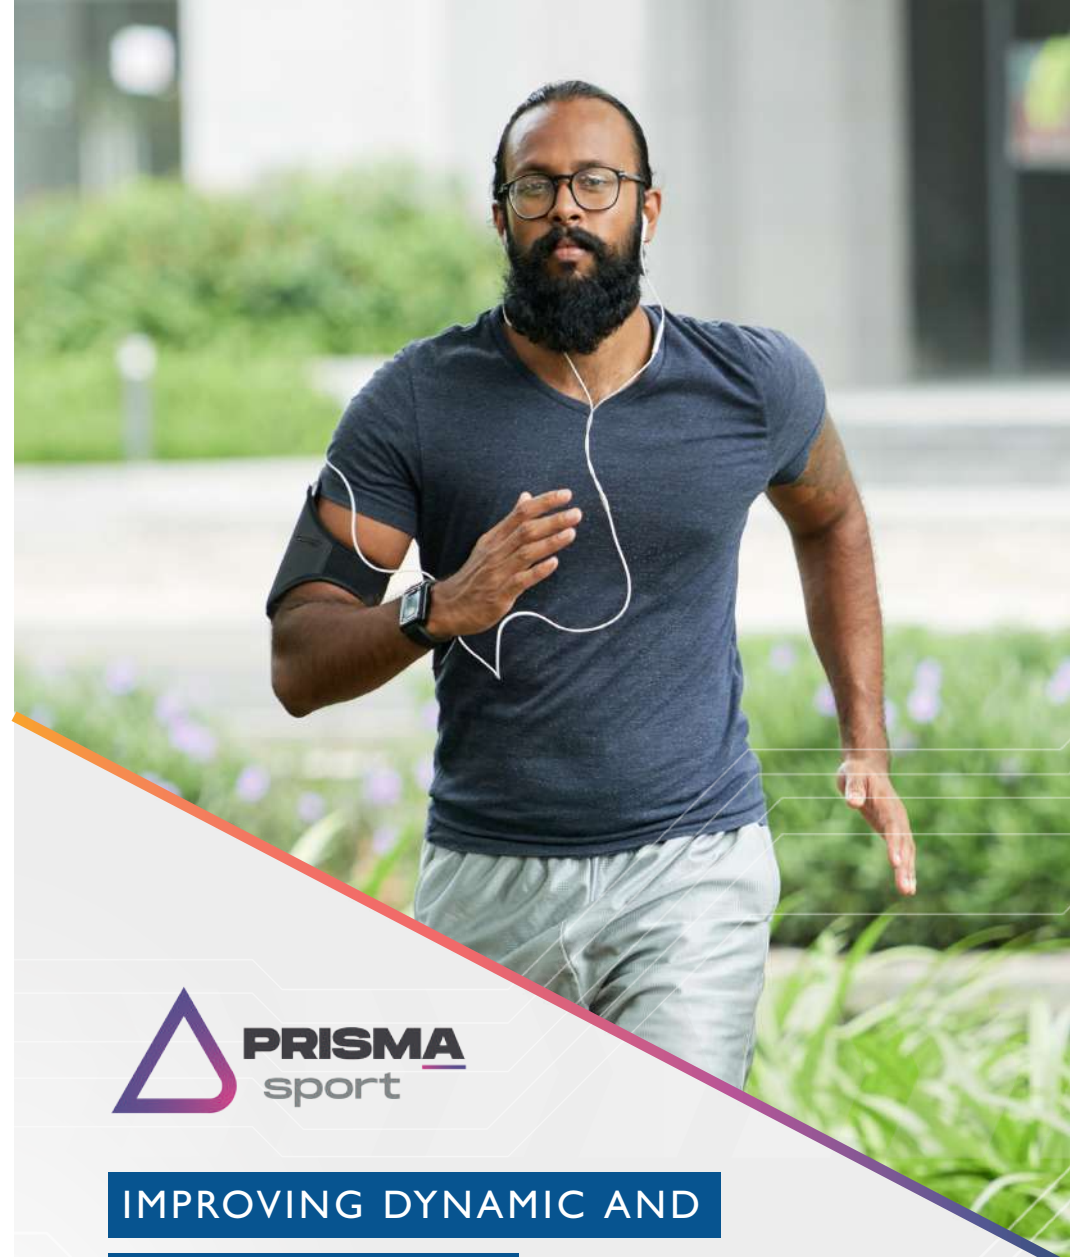

Designed for frequent wearers of electronic devices, aged over 40 years and who also demand a high-end lens.

IMPROVING DYNAMIC AND
DISTANCE VISION

IMPROVING DYNAMIC AND DISTANCE VISION

Today, PAL wearers practice more and more sports. Therefore, a progressive capable of providing them **with the best optical quality in distance and intermediate vision has been developed.** Dynamic vision is the key to success in this type of lens.

DESIGN DETAILS

Prisma Sport has been designed to **meet the visual needs that appear when playing sports.** The near vision area is in line with a sporty design, **created to focus on objects slightly away from the wearer.**

This will provide **effectiveness and comfort** in the perception of objects such as watches, sportmeters, compasses, bike speedometers... Typical sports frames have a large size and steep base curves. Prisma sport **is compatible with any frame.**
